

NCLEX® Translation Lexicon

To achieve consistency in the NCLEX® Translation process, Termium Plus® database (<http://www.btb.termiumpius.gc.ca>) is one of several resources used to translate items from English to Canadian French. This database is the government of Canada's terminology and linguistic data bank. This standardized data bank holds several million French/English equivalents to facilitate consistent translation of the official languages of Canada.

Due to the specificity of the nursing profession, there are occasions when no translation exists in the Termium Plus® database for some nursing and/or health care terminology. In those instances, NCSBN utilizes an alternate approach to obtain a comprehensible term. Research is conducted using credible sources to obtain an acceptable translation. As a result, a NCLEX Translation Lexicon has been developed for the purpose of item translation. The lexicon verbiage has been approved during the NCLEX Translation process. The list will continue to be refined during the ongoing translation of items.

Additionally, representation of gender in NCLEX items has to take an alternate approach. Canadian French language assigns gender to terminology. Historically, NCLEX items are gender neutral with the exception where gender is required to respond to an item. As a result, in NCLEX items, the feminine gender is used without prejudice for certain terms (teachers, nurses, experts in the matter, etc.) in order to lighten the text.

The Termium Plus® database represents the comprehensive lexicon for the translation of the NCLEX. The list below is not intended to be a comprehensive lexicon; rather this list represents only those issues where a consensus at a translation review panel either could not be made or when no translation exists. In those cases the Lexicon Panel, comprised of bilingual Canadian nurses, made the final determination on translation issues.

Be sure to access Translating the NCLEX at nclex.com/About.page for more details.

Formatting Standards

Units of Measurement	U.S. Customary and metric systems i.e. 4,8 km (3 miles)
Denoting Time	24-hour clock i.e. 07:00, 19:00

Terms

English	Français (Canada)
abdominal cavity	cavité abdominale
activities of daily living	activités de la vie quotidienne
admission assessment	évaluation à l'admission
adult child or children	fil adulte / fille adulte / enfants adultes
apical pulse	pouls apical
aspirate	aspirer
blood pressure	tension artérielle
blood pressure cuff	un brassard du sphygmomanomètre
bruise bruises bruising	ecchymose ecchymoses ecchymosé, ecchymoses

Terms	
candidates	candidates et candidats
chest physiotherapy	physiothérapie respiratoire
cleansing swab	tampon antiseptique
clients	clients
colonoscopy	coloscopie
computed tomography (CT) scan	tomodensitométrie (TDM)
dependent position	position décline
discontinue (a medication)	cesser
drug dependence	toxicomanie
end of life care	soins de fin de vie
enteral feeding	alimentation entérale
finger stick blood glucose level	glycémie capillaire
fluid volume	volume liquidien
follow-up	nécessite un suivi
full code status	directive de réanimation complète
green leafy vegetables	légumes verts feuillus
head of the bed	tête du lit
ice chips	glaces concassées
increased intracranial pressure	augmentation de la pression intracrânienne
indwelling urinary/urethral catheter	sonde vésicale à demeure
intake and output	ingestas et excréta
laboratory test results	résultats des tests de laboratoire
licensed practical nurse/licensed vocational nurse	infirmière auxiliaire
lift sheet	une alèze
loss of capture	perte de capture
low-stimulation environment	environnement faible en stimuli
mental alertness	vigilance mentale
oral swab	frottis oral
oriented to person, place, time, and situation	orienté à la personne, au lieu, au temps et à la situation
palliative care	centre ou maison ou établissement de soins palliatifs
peer to peer	par les pairs soutien par les pairs enseignement par les pairs (éducation)
population	population
primary health care provider	prestataire principal de soins de santé
pulse oximetry reading	saturation pulsée en oxygène

Terms	
random blood glucose	glycémie aléatoire
reference range	intervalle de référence
registered nurse	infirmière autorisée/immatriculée
return demonstration	démonstration en retour
short acting bronchodilator	bronchodilatateur à action rapide
sickle cell anemia/disease	anémie falciforme (drépanocytose)
sickle cell crisis	crise d'anémie falciforme (crise drépanocytaire)
skin turgor –poor skin turgor	turgescence cutanée –diminution de la turgescence cutanée
specific gravity	densité
staff education program	programme de formation du personnel
strict bed rest	repos complet au lit
substance abuse alcohol/drug abuse	l'abus de substances abus d'alcool ou de drogues
swab	un écouvillon
thyroid stimulating hormone (TSH)	thyroïdostimuline (TSH)
tremors, fine tremors	tremblements, tremblements légers
ultrasound, ultrasonography	échographie
urine specific gravity	densité urinaire
